DELIGHTFUL INNOVATION!

lille

Small smaller lille.

food duck®

SMALL DEVICE, BIG EXPERIENCES

DEMANDS LITTLE, GIVES A LOT

The device is easy to place anywhere, thanks to its small size and optional detachable power bank.

CLEANLINESS IS KEY

The advanced device brings hygiene and cleanliness to bread buffets and food counters.

SUSTAINABILITY – BE A FORERUNNER

The decrease in the amount of wasted spread and packaging material waste lead to a remarkable environmental improvement.

JUST THE RIGHT AMOUNT

Thanks to its smaller, 400-gram spread package, the device is well suited to places where less spread is consumed.

EASY AND SMOOTH

Even very young users easily learn to use the device, making it well suited to for day-care facilities.

STYLISH SERVING

An attractive and modern bread buffet.

SMALLER THAN BEFORE

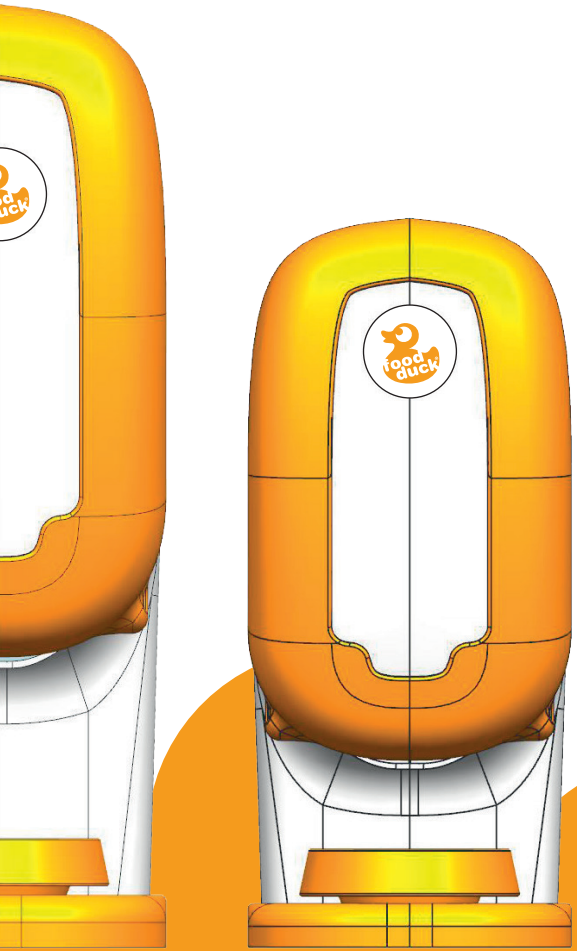
SMALLER SPREAD PACKAGE

THE WORLD'S SMALLEST SPREAD DISPENSER

FOODDUCK® lille is the newest member in the family of Finnish FOODDUCK® spread dispensers. Its smaller size makes it versatile for use everywhere.

10 REASONS TO SELECT FOODDUCK® lille

- Smaller environmental burden and decreased waste disposal costs.
- Reduces environmental impact – only uses a tenth of the plastic packaging of traditional spread cases!
- Fully aluminium-free packaging is easier to recycle.
- Leasing the device is an easy and cost-effective solution.
- Hygienic and safe – also for people with coeliac disease.
- Less waste of spread and packaging material.
- Thanks to its smaller, 400-gram spread package, the device is well suited to places where less spread is consumed.
- Spread is not exposed to oxygen, light or surface bacteria.
- A tidy and attractive bread buffet – a happy customer.
- Saves time and makes serving smoother.



EASY TO USE

The device is easy to use and clean. It automatically informs staff when spread runs low and packages need to be changed.

ONLINE REPORTING

The system can collect data on consumption, and can help to optimise usage.

REMOTELY CONTROLLABLE AND LEARNING

(INTERNET OF THINGS)
The device produces real-time information on spread consumption, automatically anticipating upcoming service needs and even ordering more spread.

WIRELESS OPERATIONS

An optional detachable power bank for the device make it wireless, so it can be placed anywhere.
